

## Order Control Data Sheet

### In brief ...

With Delstree Control it's never been easier to place orders and quotations, whether by telephone, mail order or e-commerce.

Order Control offers complete order entry and retrieval features that reduce the re-entry of information.

No longer limited to just printing, any order correspondence can be emailed, faxed or printed.

### Key Features

- Scheduled Orders
- Templated Correspondence
- Multiple pricing hierarchies
- Secure credit/debit card processing
- Multiple order contacts
- Integrated delivery services
- Integrated stock
- Full order amendment

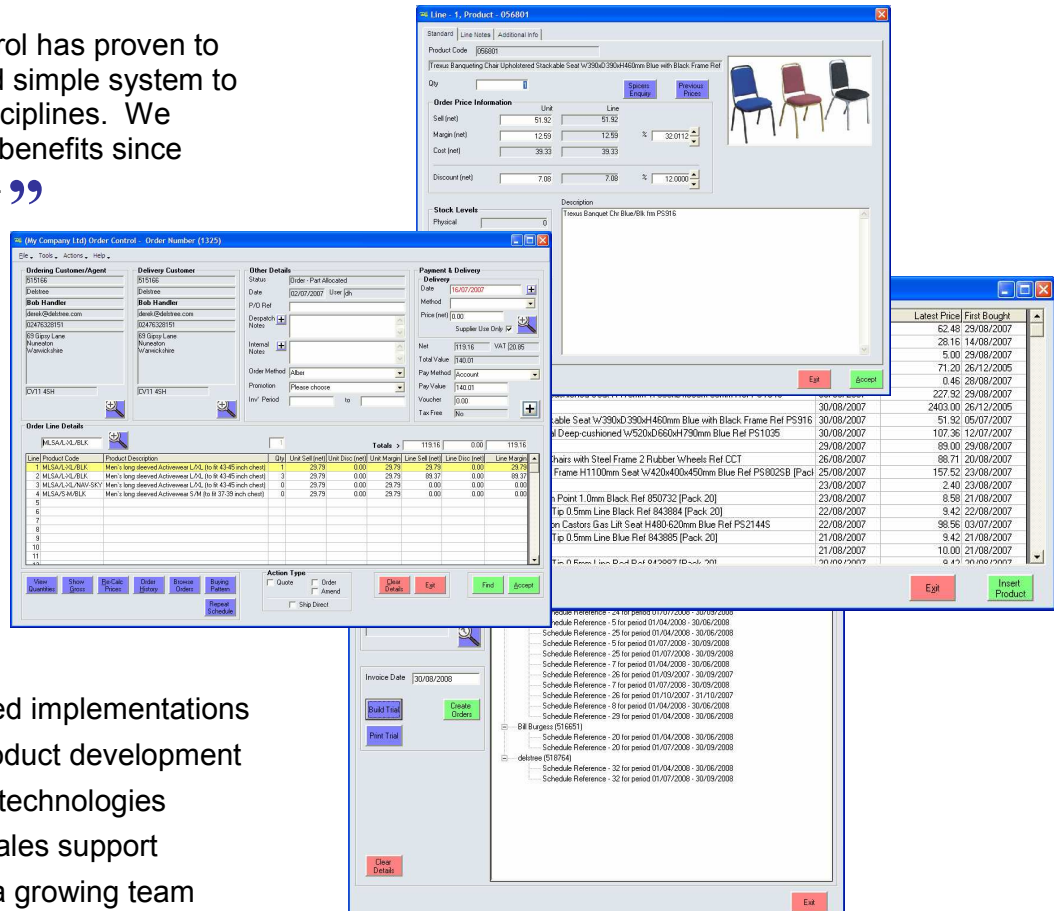

### Benefits

- Improve company image across all media
- Having all information at hand improves customer relations
- Save time by removing duplication of data entry
- You can be happy in the knowledge that promised delivery dates can be hit
- Ensure your business is PCI compliant
- Same day deliveries can be done quickly & easily

“ Delstree Control has proven to be a first-rate and simple system to use across all disciplines. We have seen many benefits since using the system. ”

Peter Wingrave,  
Director,  
AAT

- Fully managed implementations
- Continual product development
- Future proof technologies
- Great after-sales support
- Be a part of a growing team

The screenshots show the Delstree Control software interface. The main window displays order details for 'Line 1, Product: 056801'. It includes sections for 'Order Price Information' (Sell price, Margin, Cost, Discount), 'Stack Levels', and 'Payment & Delivery'. A table lists items with columns for Line, Product Code, Description, Qty, Unit, Line Price, Line Margin, Line Cost, and Line Weight. A 'Latest Price' window shows a list of items with columns for Latest Price and First Bought. An 'Invoice' window shows the invoice date and various buttons like 'Bulk Print', 'Create Orders', and 'Print List'.
