

## Reporting Data Sheet

### In brief ...

Getting information out of your business couldn't be simpler.

Reports are dropped into Excel at the touch of a button. No add-ins or setup required.

Integration with other reporting and business intelligence tools is straight forward and secure.

### Key Features

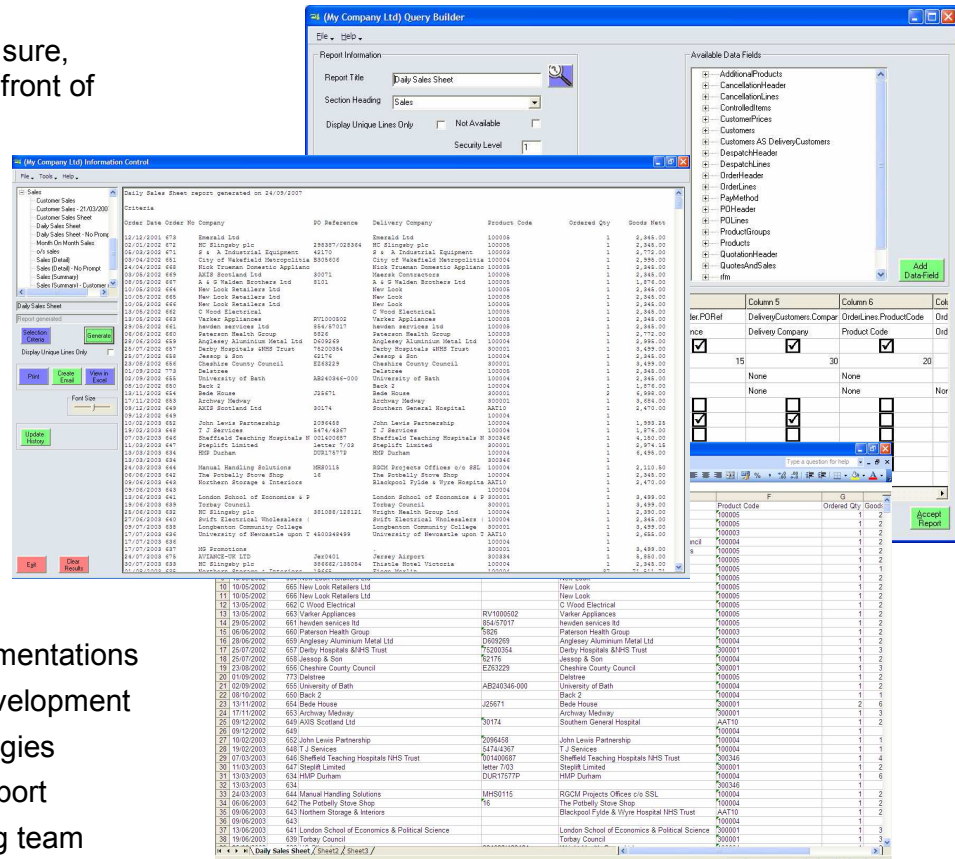

- Standard reports suite
- Easy criteria selection
- Menu driven reports
- Excel view options
- Customer list generator
- Customer history updates

### Benefits

- Make decisions based on hard facts not gut feelings
- Information is available without needing an army of IT staff
- Send out reports via email quickly and easily
- Generate mailing lists to mail and email merge quickly and easily

“ This is a proper direct commerce solution, to be sure, with a promising future in front of it. ”

Ernie Schell,  
Managing Director,  
Marketing Systems Analysis

The screenshot displays the 'My Company Ltd Query Builder' interface. The 'Report Information' section shows 'Report Title: Daily Sales Sheet' and 'Section Heading: Sales'. The 'Available Data Fields' list includes items like 'AdditionProducts', 'CancellationHeader', 'Customer', and 'ProductCode'. The main data table has columns: Date, Sales Order No, Company, PO Reference, Delivery Company, Product Code, Ordered Qty, and Stock Avail. The table lists various sales orders from different companies and dates, such as '02/22/2002 478 Emerald Ltd' and '02/02/2002 472 BT Ellingroy plc'.

- Fully managed implementations
- Continual product development
- Future proof technologies
- Great after-sales support
- Be a part of a growing team
