

Serial Number Tracking

In brief ...

Fully integrated serial number tracking makes handling warranty and servicing a breeze.

Products and services are tagged to capture new serial numbers or match up with existing.

Key Features

- Capture serial numbers at despatch or create reminders
- Find orders by serial number
- Generate and track annual service reminders
- Tie insurance and warranty documents to the original order
- Maintenance schedules driven by the system

Benefits

- Do not worry about compliance with servicing and warranty regulations
- You know which items do and don't have cover when discussing with clients.
- Engineers know exactly what kit will be present when they go on a site service
