

Spicers Data Sheet

In brief ...

Working with Spicers has never been easier.

Whether you want to know which Spicers' warehouse can fulfil your order, or you need to create and send a purchase order, book stock in and despatch today's orders, Delstree has a simple-to-use interface and state-of-the-art integration.

If Spicers offer the service, Delstree can or will provide the integration!

Key Features

- Fast online stock checks from "Order Entry" to Spicers' warehouses
- Seamless integration with OSCARNet
- Suggested purchase order options based on demand minus stock and outstanding purchase orders
- Automated purchase order creation and goods receiving from Spicers
- Clever pick, despatch, and allocation rules
- Full Sage Line 50 integration

Benefits

- Save loads of time when creating, sending and receiving purchase orders
- Keep your customers informed, happy and loyal by offering them the goods and service they expect
- Be sure in the knowledge that cash flow is maximised
- Never worry about back orders falling off your radar. Delstree Control tracks and monitors by exception.
- Standard import routines ensure data is up to date

“ The system is easy to use, with a well-laid out interface, and the entire documentation for the system is on each users' terminal, in case they need a reminder. ”

Ernie Schell,
Managing Director,
Marketing Systems Analysis

- Fully managed implementations
- Continual product development
- Future proof technologies
- Great after-sales support
- Be a part of a growing team
